

## How to customize the length of your Oyster Metal wristband?

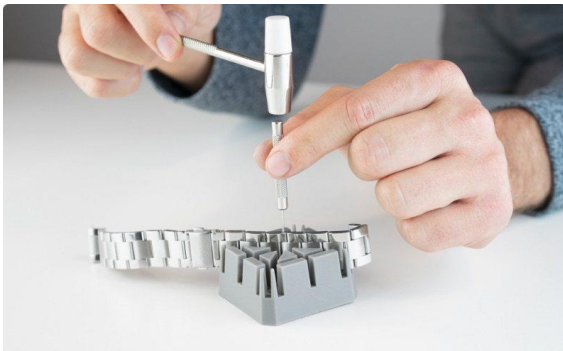

Follow the instructions to add or remove links to the Oyster Metal wristband.

### STEP 1

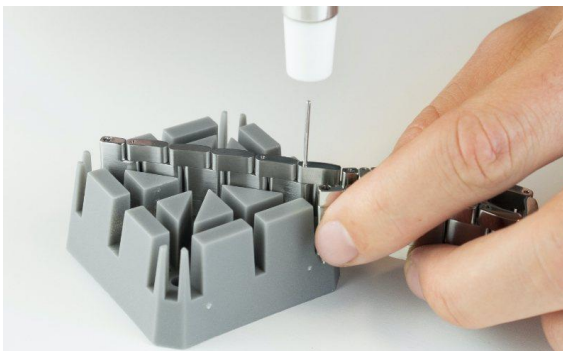

Detach the wristband from your Withings watch and place it on the base. The band has arrows indicating the direction in which the pin is to be pushed outward from the holes.

### STEP 2

Use the small hammer to get the pushpin out of the wristband. Pull the pin from the other side when possible.

### STEP 3

Rejoin the band by using a pin to join the remaining links and the buckle.
